

ANANTWAR EYE HOSPITAL

About Us

Anantwar Eye Hospital was started on 1st of October 2007. The hospital provides a comprehensive eye care facility. It is a well-equipped center for eye care with the motive of achieving eye health by educating people and proper management of eye problems at a cost effective rate so that a large number of population can take benefit of the amenities at the center

In the field of Modern Ophthalmology with ever-changing surgical techniques and modern concepts it is extremely necessary to bring up to date the knowledge and the facilities. This center strives to pull out all the stops to achieve it and make it available for the common man.

SERVICES

Facilities

PHACOEMULSIFICATION CENTER (MICRO/COLD PHACOEMULSIFICATION)

From less-traumatic surgery to earlier return of vision, new Phacoemulsification cataract removal technology is delivering ever-increasing benefits to patients. Phacoemulsification systems offer new capabilities that allow surgeons to move up to the next step in cataract surgery—bi-manual micro incision phacoemulsification. Visual outcomes are improved with this technology. MICRO/COLD Phaco gives the surgeon the ability to control ultrasonic and aspiration simultaneously and independently. With this new technology available at our hospital, we will be performing procedures with incisions as small as 1.0mm. With traditional Phaco, wound burns are often a real possibility. The new Cold Phaco technology reduces risk to the patient and may enable better recovery.

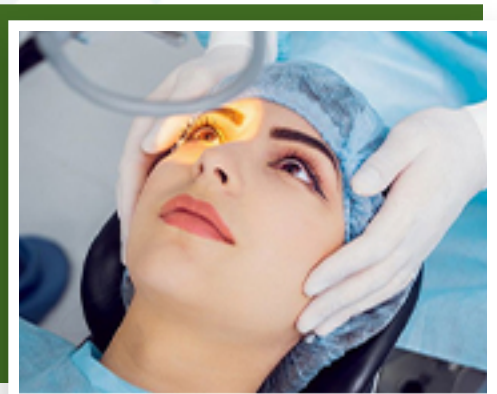

PEDIATRIC OPHTHALMIC

Now days in Plan 2020, the Central Government is considering Under NP.C.B. to give stress not only on Cataract Surgery, but also include preventive aspects in Pediatric Ophthalmology like Refraction, Squint, Congenital Anomalies. And Low Vision Aids, and Glaucoma.

Dr Pankaj S. Anantwar has completed his training in Pediatric Ophthalmology and Strabismology under Dr Milind Killedar, Anuradha Eye Hospital, Sangli, a renowned pediatric ophthalmologist in Maharashtra. Our hospital has all the facilities available for the evaluation and treatment of pediatric eye problems.

LASIK CENTER

A world where everything is bright, beautiful and clear. Where you can see things the way God meant you to. Where playing your favorite sport or getting a job isn't a problem because of your eyesight. LASIK laser eye surgery is God's send for those patients who suffer from the vision defects which need spectacles and contact lenses. LASIK laser eye surgery was developed more than 20 years ago, and more than 40 million eyes have been treated so far. Laser Vision Center has been one of the pioneers of LASIK laser eye surgery in Nagpur, and we in alliance with the center are committed to ensuring that our patients can get the benefit of the most advanced technology.

RETINA CENTER

Vitreous Retinal Services at Anantwar eye hospital offer wide ranging and all inclusive medical and surgical management of all Vitreous Retinal diseases with advance technology. Diseases like diabetic retinopathy, vascular blocks, and age related macular degeneration, trauma and retinal detachment handled by our clinic. Investigations and procedures available include fluorescein angiography, optical coherence tomography, ultra sonography, laser treatment, immunologic diagnosis and vitreo-retinal microsurgery.

GLAUCOMA CENTER

Glaucoma is the second leading cause of blindness in the world, according to the World Health Organization Estimates put the total number of suspected cases of glaucoma at around 65 million worldwide. It is a group of eye diseases that gradually steal sight without warning. In the early stages of the disease, there may be no symptoms. Experts estimate that half of the people affected by glaucoma may not know they have it.

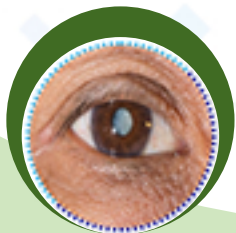

OCULOPLASTY CENTER

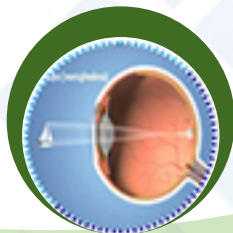

Ophthalmic plastic surgery or "Oculoplasty is the branch of ophthalmology that deals not only with the diseases of the eye, but also important structures around the eyes like eyelids, eyebrows, orbit and the tear system which are vital to the normal appearance and function of our eyes.
